International cooperation & Research focus

The University of Gdańsk boasts significant scientific achievement, particularly through activity and research connected with the sea. It implements a host of diverse scientific research, representing the Humanities, Economic Sciences as well as the Social, Exact and Natural Sciences. The most notable successes have been achieved in the fields of biomedical and biomolecular research as well as theoretical foundations for quantum technologies. The University of Gdańsk participated in establishing the International Centre for Cancer Vaccine Science and the International Centre for Theory of Quantum Technologies (ICTQT).

The following research and undertakings regarding among others blue biotechnology, biodiversity, marine ecosystems, sustainable development of cities or biomedicine, have also been conducted at the University of Gdańsk as part of European centres and networks of excellence:

- Research and Education Centre for Urban Socio-Economic Development (RE COURSE)
- Centre of Excellence for Baltic Development, Education and Research (BALTDER)
- Centre of Excellence in Bio-safety and Molecular Biomedicine (BioMoBil)
- Marine Biodiversity and Ecosystem Functioning (MARBEF)
- European Vigilance Network for the Management of Antiviral Drug Resistance (VIRGIL)
- Centre of Molecular Biotechnology for Healthy Life (MOBI4Health)

More information on the projects within the international cooperation can be found at: https://en.ug.edu.pl/cooperation/projects
English taught study programmes

Among others, the following programmes are taught in English:
- Bachelor level: Cultural Communication
- Master level: Quantum Information Technology
- Master level: Marine Biotechnology

- All English taught programmes can be found via: https://old-en.ug.edu.pl/study/educational_offer

Infrastructure

The University of Gdańsk offers, among others, the following infrastructure to students and staff:
- Foreign Languages Centre
- More than 1,600,000 volumes in the collections of the University Library, more than 500,000 books available electronically, more than 130,000 periodicals available electronically
- More than 85,000 works available in Pomeranian Digital Library
